EXISTING CHIMNEY CERTIFICATION FORM

EXCERPT FROM THE VIRGINIA UNIFORM STATEWIDE BUILDING CODE - 2003 EDITION

SECTION 103.9 Equipment Changes.

Upon the replacement or new installation of any fuel-burning appliances or equipment in existing buildings, an inspection or inspections shall be conducted to ensure that the connected vent or chimney systems comply with the following:

1. Vent or chimney systems are sized in accordance with either the International Residential Code, the International Mechanical Code or the International Fuel Gas Code, depending on which is applicable based on the fuel source and the occupancy classification of the structure.
2. Vent or chimney systems are clean, free of any obstruction or blockages, defects or deterioration and are in operable condition.

Where not inspected by the local building department, persons performing such changes or installations shall certify to the building official that the requirements of Items 1 and 2 of this section are met.

The existing chimney, at the following street address in the County of Rockbridge,

is hereby certified as meeting the requirements of the above referenced code section.
